B.Eng. Computer Engineering Expected Grad 2028

- McGill Athletic Scholarship recipient and Vancouver District Scholarship recipient.
- Probability & Statistics, Digital Logic, Algorithms & Data Structures, Design Principles and Methods, Model Based Programming, Software Engineering, Thermodynamics of Computing, Electric Circuits, Electronics, Signals and Systems, Computer Architecture, Software Development, Comm Systems and Networks

WORK EXPERIENCE

ATS Traffic Pte Ltd **Singapore**
Engineering Intern May 2026 - Aug 2026

- Supported engineers with traffic control system projects, assisting with system testing and operational workflow.
- Supported engineers with equipment installation, maintenance activities and troubleshooting of equipment.
- Worked onsite with engineering teams for system checks, related equipment and engineering standards compliance checks.
- Assisted with administrative tasks and prepared technical documentation and reports.

Reference : Mr Wee Tuan Meng, Managing Director, tmwee@atstraffic.com.sg

Compass Group **Singapore**
Data Analyst Intern May 2025 - Aug 2025
Remote Nov 2024 – May 2025

- Implement integration from SAP procurement purchases data and develop trend analysis data from MS Sharepoint to Power BI for the finance department with data analysis solutions and reporting workflows.
- Built Power BI dashboards with financial, procurement and vendor data across key KPIs to identify spending trends, monitor procurement activity, supplier performance and purchasing trends.
- Assist IT project managers on system testing, configuration, and setup for new builds, including content uploads.
- Provided technical deployment at Compass client sites including level 2 technical support for Microsoft systems, Sharepoint, and end-user hardware systems.

Reference : Mr Kenneth Foo, Head of Information Technology (Consultant), kenneth.foo@compass-group.sg

PROJECTS

Alta Construction Group **Montreal, Canada**

- Collaborated with Alta Construction Group, a licensed startup company visionary in technology awarded by McGill Engine's Summer Startup Internship Award Program
- Developed automation server-side workflows and Python web-scraping tools to collect, process, and structure business and property data for internal use.

Coverday Application

- Independently coded and built a comprehensive all-in-one financial dashboard application that centralizes every aspect of a user's financial life. It acts as a unified ecosystem that tracks real-time finances, categorizing expenses, automated alerts on upcoming bills and monitors investment portfolio or loans to provide an overall single source of personal finance.

ATHLETICS

McGill University - Redbird Men's Swimming **Montreal, Canada**

- Mcgill Varsity swimmer and Record Holder, trained 20+ hours per week alongside academic commitments till 2026.
- 2024 Canadian Olympic Trials Bronze Medalist; 4x U SPORTS individual finalist and team bronze medalist; Canada Games Gold and Bronze Medalist; Quebec Age Group Record Holder.
